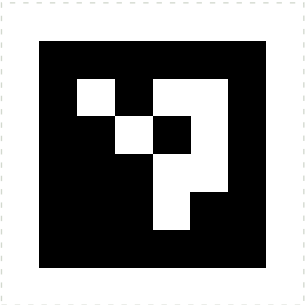
Tracking markers

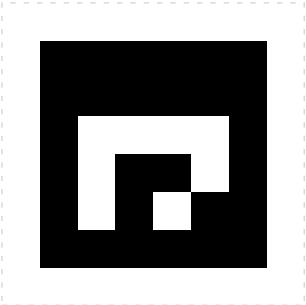
63-column board / ArUco DICT_4X4_50 / IDs 0, 1, 2, 3

PRINT AT ACTUAL SIZE (100%). Turn off "Fit to page".

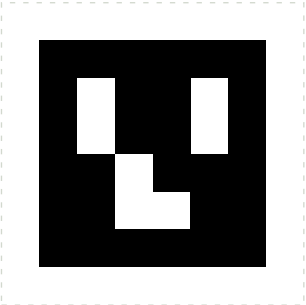
Each black square should measure 30 mm. Preserve the white border when cutting.



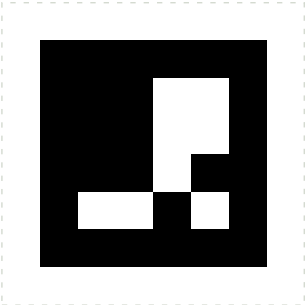
ID 0 - TOP LEFT



ID 1 - TOP RIGHT



ID 3 - BOTTOM LEFT



ID 2 - BOTTOM RIGHT

ATTACH TO THE SAME FLAT ASSEMBLY AS YOUR BOARD

Keep all four markers in view, near the board corners, without covering any holes.

Use matte paper, steady lighting, and an overhead camera. Keep markers fixed to the board.

Calibrate an empty board: a1 > a63 > j63 > j1. Then save the aligned hole grid.

Test reference: a1 to a5. Move the second end to a6 for the wrong-column test.

Scale check: this ruler must measure 50 mm.

Ordinary QR codes are not interchangeable with these markers.
